Introduction

Digital India is a campaign launched by the Government of India to create digital infrastructure to connect and empower citizens, businesses, government and education. It is a part of the National Digital Dividend strategy.

Objectives

1. To provide digital infrastructure to all citizens.

2. To provide digital services to all citizens.

3. To provide digital opportunities to all citizens.

4. To provide digital security to all citizens.

5. To provide digital literacy to all citizens.

Type 3: JDBC-Net pure Java

- In a Type 3 driver, a three-tier approach is used to access databases. The JDBC clients use standard network sockets to communicate with a middleware application server. The socket information is then translated by the middleware application server into the call format required by the DBMS, and forwarded to the database server.
