7.2.1 Describe two best practices successfully implemented by the Institution as per NAAC format provided in the Manual

Best Practice : 2 Welfare activities to support underprivileged students to pursue higher education

1. Title of the practice:

Welfare Activities to support underprivileged students to pursue higher education

2. Goal

The percentage of students from under privileged background is much lower due to gender discrimination and financial constraints. Financial assistance needs to be provided to these students to enable them to complete higher education as once educated; these Students can become a channel for improving the quality of life both at home and outside. By encouraging and promoting education of Students, they can be empowered for a better future.

3. The Context

Majority of our students are from socio-economically challenged segments of the society. Personal interactions with students and analysis of the dropout statistics has revealed that family and financial constraints prevent them from completing higher education and lead them to drop-out midway through the course. It was observed that supporting them with financial assistance would help them to pursue higher education. Hence, it was decided to provide financial help in the form of scholarships and instalment payments of fees

4. The Practice

Under this scheme, needy students receive scholarship to pursue higher education to complete professional courses at our institute as the fees of such courses are high, the needy students take loans. hence. Scholarships are awarded to students who are unable to pay the fees.

Institute also allow them to pay the remaining fees in instalment so that they can complete their course and these Students can become a channel for improving the quality of life both at home and outside

5. Evidence of success

Around more students are taking the benefit of the scholarship per year and the admission rate is very good. Most of the students who have completed their courses are now well placed in life and their standard of living has improved.

The beneficiaries of the scholarships have been able to complete their education successfully. With this it has been observed that the attendance and academic performance of the students have improved.

6. Problems encountered

The Trust works very hard in to give scholarship to these students but till there are a smaller number of students perusing because of their family conditions But Taking help of past and current students has helped us to raise the number of students. Convincing financially weak but desirous students to utilize financial assistance in the form of scholarship for pursuing professional courses is a challenge.
